09318332070 | Mauban, Quezon | cronvincent@gmail.com | github.com/lucifron28
linkedin.com/in/ron-vincent-cada | ron-cada-portfolio.vercel.app

BS Information Technology student specializing in Web and Mobile Application Development, with hands-on experience building backend APIs and full-stack applications using C#, ASP.NET Core, Python, Django REST Framework, React, and SQL. Seeking a software engineering or backend development internship.

EDUCATION

Manuel S. Enverga University Foundation | Lucena City, Quezon | Expected 2027

Bachelor of Science in Information Technology, Web and Mobile Application Development | GWA: 1.315 | University Scholar | Dean's Lister

TECHNICAL SKILLS

Languages: C#, Python, JavaScript, TypeScript, SQL, Kotlin

Web: HTML, CSS, React, ASP.NET Core, Django REST Framework, REST APIs

Data: PostgreSQL, SQL Server, Entity Framework Core

Tools & Cloud: Git, GitHub Actions, Docker, Docker Compose, Azure fundamentals

Mobile: Kotlin, Jetpack Compose

SELECTED PROJECTS

UniPM (Team Capstone) | C#, ASP.NET Core, React, SQL Server, Docker | *2026-Present*

- Develop C# and ASP.NET Core APIs for a university preventive-maintenance system that helps staff manage equipment, maintenance schedules, and inspections, with JWT authentication and role-based access across five user roles.
- Built a SQL Server search and AI-assisted review feature that retrieves relevant maintenance history before generating source-backed summaries; maintain automated tests, database migrations, health checks, and CI.

Sidekick (Team Capstone) | C#, ASP.NET Core, React, PostgreSQL, Docker | *2026*

- Built React workflows for a talent marketplace covering profiles, skills, gigs, applications, and contracts, and integrated the frontend with ASP.NET Core Identity authentication.
- Set up Docker Compose and environment configuration across the React client, ASP.NET Core API, and PostgreSQL database.
- Collaborated through Git branches, pull requests, code reviews, and mentor feedback.

Enverga Arena | Python, Django REST Framework, React, TypeScript | *2026*

- Built a Python/Django REST Framework and React intramurals platform where students view schedules and results while departments and administrators manage tournament activities; secured online tryouts with email OTP, rate limiting, Turnstile, and duplicate-submission protection.

StudyLens | Kotlin, Jetpack Compose, Python, Django REST Framework, PostgreSQL | *2026*

- Built a native Android study application that scans learning materials with CameraX and ML Kit OCR, then uses JWT-secured Django REST Framework and PostgreSQL APIs for notes, flashcards, quizzes, progress tracking, and summaries.

ScrybeSync | Python, Django REST Framework, PostgreSQL, Celery, Redis, Docker | *2025*

- Built an application that converts uploaded audio and video into transcripts, summaries, and linked notes; used Celery and Redis to process long-running Whisper and summarization work in the background while enforcing JWT-based ownership controls.

AWARDS

Top Performer & Best in Capstone - Open iT Applied Full Stack and Data Science Bootcamp | 2026

1st Place, Open iT Codefest - 27-hour Inter-Institution Hackathon | 2025

Top Individual Performer, Hack4Gov CALABARZON CTF | 2025

2nd Place, DLSU-D SikapTala National CS and IT Skills Competition - Python Collegiate Category | 2025

1st Place, Stage 3 & Grand Finals Finalist - CodeChum National Programming Competition | 2024

TRAINING

Open iT Applied Full Stack and Data Science Bootcamp - Full Stack Development Track | 2026

- Hands-on training in ASP.NET Core, React, PostgreSQL, Docker, REST APIs, and team-based software delivery.

Additional Training

• **CS50x: Introduction to Computer Science** - Harvard University (CS50): C, algorithms and data structures, memory, Python, SQL, HTML/CSS/JavaScript, and Flask

• **CS50P: Introduction to Programming with Python** - Harvard University (CS50): Python fundamentals, OOP, exceptions, file I/O, unit testing, libraries, and regular expressions

• **Intermediate PostgreSQL** - University of Michigan (Coursera): schema design and normalization, transactions, stored procedures, data import, and text/regex queries

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) - Microsoft | 2026

GitHub Foundations - GitHub
